Pursuing Bachelors of Computer Application. I have expertise in both front-end and back-end development. which means I can create solutions for your company. With my skills, I can help your company reach its objective by building advanced technology.

INTERNSHIPS

- September 2022-April 2023 | Full Stack Python Developer (Code planet Technologies Private Limited, Jaipur)
 - Successfully complete daily allotted tasks.
 - Learned & enhance new strategies of problem solving
 - Great experience in working with Team.
 - Learn Python(core/advanced), Django, Html, CSS, SQL, Data structures and algorithms

PROJECTS

- Title - Resumix
- Team Size - 01
- Tech Stack - Python, SQL, Django
- Key Role - Database Manage and API creation
- Description - I develop this project used Django to manage the backend API's, which included functions such as home, Sign In, log In, resume creation, resume deletion by primary key, retrieving all resumes, retrieving a specific resume by ID, and updating a resume. These API's are the backbone of the application, allowing users to perform all the required CRUD (Create, Read, Update, Delete) operations on their resumes. The use of SQL for database management ensures that the application is scalable and can handle a large number of resumes and users.
